➤ A New Way of Charting

OrgPlus OnDemand is taking intelligent organizational charting to the next level: online. OrgPlus OnDemand makes sharing organizational charts and collaborating with your colleagues easier than ever. The intuitive interface gives you the ability for quick chart development and maintenance. Whether you are a small, medium or large business, OrgPlus OnDemand is an affordable, secure online solution that assists you in coordinating org chart changes.

➤ Create Organizational Charts Online

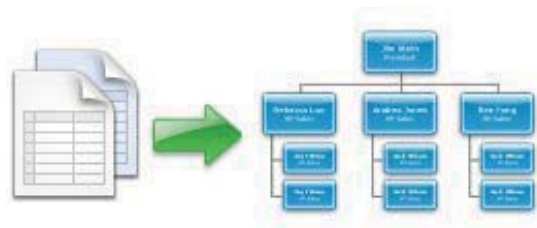

Professional, intuitive, online – OrgPlus OnDemand provides peace of mind. There is no longer a need to email org chart updates, or wait for edits from your colleagues in order to manually make the changes. This web-based application provides a quick-and-easy method for creating, modifying and sharing org charts anytime from virtually anywhere. The simple interface provides intuitive tools to develop organizational charts of any size. You can be assured that your current org charts are backed up and available 24/7.

The OrgPlus OnDemand Import Wizard provides step-by-step instructions for setting up your organization's data. The cumbersome task of drawing organizational charts is now a distant memory. OrgPlus OnDemand offers themes that easily adapt to your data. Even employee photos can be added for visual identification of your workforce. The result is professional-looking organizational charts that can be accessed from anywhere.

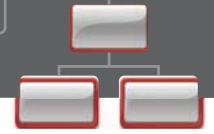

Conditional formatting creates customized views that help you better understand your organization. For example, quickly identify new employees in the company by creating visual cues such as a blue border around all contractor boxes. You can visually identify other important employee characteristics such as retiring employees or employees due for a performance review. A legends box is available to automatically show conditional formatting or add manual content.

Searching for a specific person, title or other field? OrgPlus OnDemand provides org tree profile views and search functionality to make locating information fast and simple.

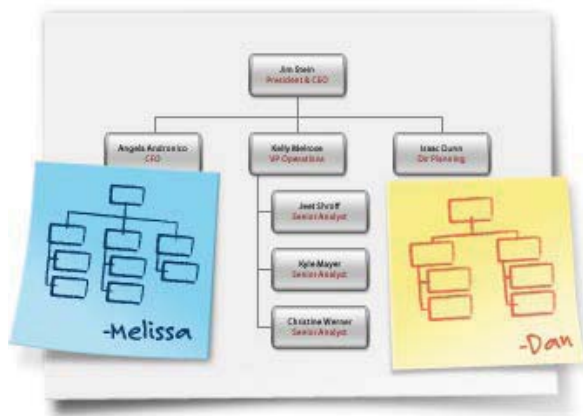

Updating your data is as simple as selecting a box and dragging it to a new location. The staging area is an off-chart panel that holds boxes (i.e. a department or an individual) until they are ready to be incorporated into the org chart. Drag and drop these boxes into the chart to model different versions of your department or even an entire organization.

Share Charts

Tired of receiving emails, memos and notes to add or change the status of an organizational chart? OrgPlus OnDemand provides access to your most current org charts. Built in security lets you assign access levels to anyone invited to collaborate with you or just view an org chart. Now you can delegate chart management to specific members of your organization.

Access to co-edit or view your org charts is granted by invitation only. Simply email individuals with whom you would like to share a chart. No additional software downloads or updates required to access OrgPlus OnDemand.

Now you can simplify the versioning process when updating org - charts. You can compare versions and even track changes by generating an easy-to-read report so that historical data is never lost. Speed the review and approval cycles by providing easy access for colleagues and key stakeholders from various departments to co-edit and view org charts online.

Publishing Capabilities

OrgPlus OnDemand gives you the flexibility to distribute your data in various formats for your convenience and peace of mind. You can present your chart via the Web, export to Excel, create a PowerPoint slide or just print a single page quickly and easily.

Advantages to OrgPlus OnDemand include:

- Collaborate securely with your colleagues online – provide access to current charts at all times.
- OrgPlus OnDemand is simple to use.
- No more software downloads or updates. OrgPlus OnDemand updates are automatic and included with your subscription.
- OrgPlus OnDemand is built on a wealth of experience from the proven success of the OrgPlus.
- Dedicated customer service support is available.
